8 responses

14. Students are encouraged to ask questions and efforts are taken to resolve their doubts

8 responses

15. Suggestions for improving the curriculum

6 responses

Please provide syllabus, competency, equipped lab, adequate training for research.

Few lectures for pg's also highlighting the important things from UG lectures.

New techniques should be available as anatomy department in other college has many new techniques and research are also done in that

Entire curriculum and syllabus to be made available to us at the beginning of the course by the university directly in written as many things are not conveyed to us. Different sources give different information which is very confusing and makes things difficult with passage of time.

More practical should be done
